

PLan's aim is to achieve, for the community, sustainability in terms of social, cultural, environmental & balanced long term economic impacts.

PLan's objectives are:-

To be an apolitical, non-hierarchical organisation that reflects a co-operative network of people who are otherwise members of a local action group, or individuals interested in planning issues;

To achieve better living environments through community advocacy of good planning principles, incorporating natural, heritage, cultural & social values throughout the NT.

To provide a network communication medium for organisations & people active in planning issues;

To support community based action groups through the exchange of experience & co-ordination of resources, & to encourage & assist new community action groups;

To monitor proposed developments & research responses;

To consider & develop expertise on wider planning issues;

To provide public education, increase public awareness & debate in relation to planning issues;

To make representations on behalf of the community to relevant agencies or organisations on particular & general planning matters.

Why not join us & influence planning in the community.

PLan is always open to new members & input from everyone in the community.
